Best offline navigation app for android auto. The best offline navigation app for android. Best offline free navigation app for android. Best offline navigation app for android 2020.

It's no doubt that Google has been on the top of Navigation with Google Maps over the past few years, but that doesn't mean that other navigation apps don't exist. There are tons of Google Maps alternatives out there that you can use on your Android device. If you are a frequent traveler, you might know that many great navigation apps rely on an internet connection to show the routes. But, what if you need GPS location when you're offline? Does your phone have a GPS app for that? Well, this is where offline GPS apps come in. Offline GPS is a vital feature for map apps as it allows users to explore cities while having data roaming turned off. Also read: How To Use Google Maps Offline List of 10 Best Offline GPS Navigation Apps For Android So, in this article, we will share some of the best offline GPS apps that you can use on your Android smartphone. Some of the apps are not entirely free, and you might need to make some in-app purchases to avail all features of these navigation apps. 1. Polaris GPS Polaris GPS is an Android app that turns your smartphone into a powerful GPS navigation system. You can use this app to find turn-by-turn directions, explore hiking maps, record tracks, and more. It also has a feature called offline maps that allows you to save maps for offline use. Apart from that, Polaris GPS offers several different map types such as Google Maps, Topographic Maps, Vector Maps, and more. If you are searching for a voice-guided navigation app for your Android smartphone, look no other than Navmii GPS World. It's a navigation app for Android that provides live traffic information, local search, and more. With Navmii GPS World, you also get the option to download and store maps on your device. You can do this to access the map without an active internet connection. 3. Google Maps Google Maps is one of the best apps to discover places and explore like a local. Guess what? With Google Maps, you can easily navigate your world faster. Right now, Google Maps covers 220 countries and territories. Not only that, but Google Maps also covers hundreds of millions of businesses and places on the map. 4. MAPS.ME If you are searching for a free GPS app for your Android smartphone with offline support, you need to give MAPS.ME a try. Guess what? In the offline mode of MAPS.ME, you can enjoy search features, voice navigation, calculate reroute, and public transportation. This one is for those who have been searching for ways to navigate without an internet connection. The great thing about MapFactor GPS Navigation Maps is that it offers free offline maps from OpenStreetMaps. The Android GPS navigation app covers more than 200 countries and thousands of restaurants, ATMs, petrol pumps, etc. 6. HERE WeGo The app offers offline GPS navigations, but it focuses more on transportation, like finding a taxi, public transportation services, etc. Not only that, but the app also compares the car, bike, pedestrian, taxi, and public transportation routes to find the fastest and most cost-effective way to make a journey. 7. Genius Maps The great thing about Genius Maps is that it doesn't require a mobile internet connection to search and navigate. Of course, it's a premium app, but it offers users a free 7-day trial with full-functional Pro Guidance and Lives traffic info. One of the best features of Genius Maps is the Live Traffic. The Live traffic features show traffic congestion, road works, and reroutes tracks. It is one of the best and top-rated navigation apps you can use on your Android device. The great thing about Sygic GPS Navigation & Maps is that it offers voice-guided GPS navigations and pedestrian GPS navigation for when you are on a walk. If we talk about the offline GPS feature, the offline 3D maps are stored on your phone for GPS navigation without an internet connection. It has offline maps for all countries in the world. 9. OsmAnd Well, if you are searching for an offline navigation app with access to free, worldwide, and high-quality offline maps, then OsmAnd might be the best pick for you. With OsmAnd, you can enjoy both voice and visual offline navigations, manage GPS tracks, etc. Apart from that, you also get the option to customize the navigation profiles for different vehicles. Overall, this is a great offline GPS navigation app for Android. 10. All-In-One Offline Maps All-In-One Offline Maps is one of the best but underrated offline maps apps available for Android devices. It has many maps available, including classical road maps, topographic maps, satellite maps, etc. Once you view any map via this app, the maps are stored and remain available on your device for offline usage. So, these are the best offline GPS Navigation app that you can use on your Android smartphone. If you know of any other such apps, let us know in the comment box below. I hope this article helped you! Please share it with your friends also. GPS Maps and navigations apps have totally changed the way we travel these days. You can have access to turn-by-turn navigation, complete traffic update, the best route to a destination, hotels nearby and many other types of handy road information, all in the palm of your hand. However, almost all of these apps require an internet connection to offer their services, and internet is a luxury that isn't available everywhere. If you want to be guided in an area without an internet connection or if you have limited data plan, then you should get a maps app that supports offline maps. And today, I will introduce you to 8 of the best offline map apps, for both Android and iOS platforms, that'll be a great help when the internet quits on you. 10 Best Mobile Apps to Plan Your Next Trip 1. HERE WeGo HERE WeGo is one of the most popular offline maps apps that has reliable online and offline features. It lets you download the complete map of a whole country with support for over 100 countries. The offline maps have full turn-by-turn voice navigation support with details on each aspect of the area. The app focuses on helping you with your commute by automatically suggesting transit options as well as get the cheapest deals on public transits and car-sharing. I am sure you will love it's dedicated guidance based on the transit method you are using, such as how hilly the route is if you are on a bike or offer step-by-step navigation when you are on foot. Download app for Android | iOS Price: Free 2. GPS Navigation & Maps Sygic This app by Sygic is known for its 3D offline maps that offer great details without any data charges. 3D maps minimize the chances of going into a wrong street, and the maps and details come from TomTom, which is known for its accurate guidance and traffic details. The app offers accurate turn-by-turn navigation for offline areas. Some of its other features include dashcam access, speed camera warnings, parking suggestions, dynamic lane guidance, and a cool Head-up Display feature that lets you see the map details on your car's windshield. Download app for Android | iOS Price: Free/ offers in-app purchases starting from \$9.99 3. Google Maps Google Maps is definitely the most famous and sought-after maps app and comes by default for most Android phones. It also includes an offline navigation feature, that, however, is a bit limited as compared to most of the other apps in this list. You are only allowed to save an offline area of 120,000 square kilometers. Even though you can save multiple areas, but this limitation may affect many international travelers. The main reason why Google beats every other app is its extensive information on maps of over 220 countries, where others hardly support over 100 countries. Like most other apps, Google Maps does a great job of showing places of interest, offering advice on transit mean, 3D maps and much more. Download app for Android | iOS Price: Free 4. CoPilot GPS - Navigation CoPilot is one of the coolest apps dedicated to drivers, and all of its features are there to help car drivers in optimal driving. It allows you to download a map of a specific region or a country with complete details of POIs and turn-by-turn voice navigation. It has built-in powerful route planning feature as well as an "ActiveTraffic" feature that automatically manages your commute based on real-time traffic conditions without your manual intervention. Unfortunately, most of CoPilot features are locked behind a paywall with a 7-day free trial. You will only get free offline navigation for a single region, however, more regions can be downloaded as in-app purchases. Some advanced features like ActiveTraffic also require an in-app purchase. Download app for Android | iOS Price: Free/ in-app purchases starting from \$0.99 5. MAPS.ME MAPS.ME takes a rather simple approach of offering navigation and only offers the essential features. Although its offline maps feature is quite reliable and lets you download any number of maps of countries and regions for free. It uses OpenStreetMaps for fetching data and updates the app as the OpenStreetMaps data is updated by the million of users. It also compresses downloaded maps to ensure it takes less space and the app itself is quite light. Although POI data and traffic data are included, but it isn't as advanced or reliable as some of the other dedicated map apps. Download app for Android | iOS Price: Free 6. Offline Maps & Navigation Indicated by its name, Offline Maps & Navigation is created to work offline using the phone's GPS. You just need to download the maps once and rest is handled by this app. It offers turn-by-turn voice navigation, automatic map updates, fixed speed camera warnings, 3D view, POI data and complete track recording. It also has a handy night and day mode that changes app theme to suit day and night timings. If you only need a navigation app for offline use, then Offline Maps & Navigation is a good option. Download app for Android Price: Free/ advanced features available as in-app purchases 7. Polaris GPS Navigation This app is specifically created for off-road daredevils who're always on an adventure. Whether you are a hiker, sailor, hunter, camper, biker or involved in any other outdoor activity, Polaris GPS Navigation is your best friend. It offers offline GPS navigation to many off-road areas with handy tools that will help you in the wild. It has a built-in magnetic compass, odometer, altimeter, speedometer, chronometer, multiple GPS tools, waypoint navigator, annotation tools and dozens of other tools to help you in your outdoor adventures. I was also amazed by dozens of official resources it uses to offer guidance, such as Google Maps, hiking maps, and NOAA Marine Charts, etc. Download app for Android Price: Free 8. MapOut MapOut is a highly customizable maps app for iOS that gives you full control over your maps. You can draw on the maps and create your own waypoints to follow. You can also download maps of complete regions and navigate places, streets and even mountains offline in both 2D and 3D views. MapOut is mainly created for adventurers who like to take matters into their own hands. It can also do a reliable job of offering on-road navigation if required. Some of its features include, track recording, topological maps, tilt based 3D view, OpenGL accelerated map rendering and more. Download app for iOS Price: \$4.95 A quick roundup I personally use Google Maps for offline navigation, thanks to its reliable vast data on locations. Although, if you are an international traveler who depends on offline maps, then HERE WeGo and Sygic Maps would work better for you. I will also recommend you to check out Offline GPS & Navigation app if you need something that completely focuses on offline navigation. Read Also: How to Style Google Maps
